PROFESSIONAL SUMMARY

Computer Science graduate with hands-on experience in software development, artificial intelligence, chatbot systems, and web applications. Strong foundation in data structures, algorithms, computer organization, and system-level concepts. Experienced in building real-world projects using AI models, RESTful APIs, and full-stack technologies. Highly motivated software engineer with strong problem-solving skills, fast learning ability, and a passion for developing scalable, user-centered solutions in collaborative technical environments.

EDUCATION

- Bachelor of Computer Science** | Imam Muhammad ibn Saud Islamic University, Riyadh | Graduation Year: 2024

PROFESSIONAL EXPERIENCE

Teaching Assistant Princess Nourah bint Abdulrahman University | Riyadh | Sep 2025 – Dec 2025

- Led laboratory sessions for Computer Organization, covering assembly language programming and low-level system concepts.
- Conducted practical sessions for Data Structures with focus on implementation, algorithmic thinking, and problem-solving.
- Delivered Professional Ethics labs addressing data privacy, AI ethics, and professional responsibility.
- Prepared lab materials, exercises, and practical assessments.
- Assisted in evaluating student performance and provided academic and technical guidance.
- Coordinated with instructors to align lab content with theoretical lectures.

Chatbot Development & AI Intern Information Technology Deanship | Imam Muhammad ibn Saud Islamic University | Riyadh | Jun 2024 – Aug 2024

- Developed and deployed university service chatbots using Microsoft Copilot and Botpress.
- Designed conversation flows to improve accuracy and user experience.
- Integrated external data sources to deliver dynamic, real-time responses.
- Applied Natural Language Processing concepts and Retrieval-Augmented Generation techniques.
- Conducted research on chatbot frameworks and AI tools to enhance system performance.

TECHNICAL PROJECTS

BAASYIR – Graduation Project Aug 2023 – Feb 2024

- Led the development of a real-time obstacle detection system for visually impaired users.
- Implemented YOLOv7 and YOLOv7-tiny models to improve object detection accuracy.
- Integrated the system into smart glasses using Raspberry Pi 3 Model B+.
- Collected datasets, trained models, and evaluated performance using the mAP metric.
- Optimized system performance across different indoor and outdoor environments.

Arshidni Chatbot Jun 2024

- Developed a tourist guide chatbot for Saudi Arabia using Microsoft Copilot and Botpress.
- Integrated external APIs and data sources to provide personalized responses.
- Built as an individual project during cooperative training.

Emotion Classification System

- Developed an emotion classification system using BERT with feature extraction techniques.
- Trained and evaluated models on diverse datasets to improve classification accuracy.

Distributed Systems – RESTful APIs & CRUD Application

- Developed RESTful APIs using Node.js and Express.js.
- Implemented CRUD operations with UUID integration.
- Improved error handling and performed API testing using Postman.

Network Security – PKI & SSL Implementation

- Configured a Certificate Authority (CA) and deployed X.509 certificates.
- Implemented SSL on Apache server environments.
- Simulated Man-in-the-Middle attacks to identify and mitigate security vulnerabilities.

FEEDNI Web Application

- Developed a web-based platform for sharing knowledge and user experiences.
- Enhanced UI usability to improve navigation and search functionality.

ADDITIONAL PROJECTS

- COIN CUEST Game:** Developed a Unity-based game applying game design documentation practices.
- Alhilal Alanmar System:** Built scheduling software for Saudi Red Crescent ambulance services.
- Airline Reservation System:** Designed relational database schema and data models.

TRAINING & CERTIFICATIONS

- **Game Development Using Unity Engine** | Tuwaiq Academy & Misk Foundation | 2025
- **RASA for Beginners** | Udemy, 2024
- **Web Development Course** | Satr, 2023

COMPETITIONS & ACTIVITIES

- GameDev.TV Game Jam – Ranked 56 out of 1030 participants (2025)
- PSU & ACM Programming Jams – Participant (2021, 2023)

VOLUNTEER & LEADERSHIP EXPERIENCE

- Consultant, Multilingual Club – Aug 2024 – Present
- Member, Multilingual Club – Aug 2023 – Aug 2024
- Japanese Language Teacher – Dec 2024 – Jan 2025

SKILLS

Technical Skills

Artificial Intelligence | Machine Learning | Natural Language Processing (NLP) | Retrieval-Augmented Generation (RAG) | Chatbot Development | RESTful APIs | Database Design | Network Security | PKI | SSL | Game Development | Web Development

Hard Skills

Python | Java | JavaScript | C# | C++ | Node.js | Express.js | Botpress | Microsoft Copilot | Unity Engine | BERT | YOLOv7 | Raspberry Pi | Postman | Git | API Integration

Soft Skills

Problem Solving | Analytical Thinking | Communication | Time Management | Team Collaboration | Adaptability | Leadership | Innovation

LANGUAGES

- **Arabic:** Native
- **English:** Advanced
- **Japanese:** Conversational
