PROFESSIONAL OVERVIEW

Computer Science graduate with practical experience in game development, AI, and web applications. Currently enrolled in a Game Development Bootcamp at Tuwaiq Academy. I've developed 2D and 3D games using Unity and C#, including Ghost Village, Reset, and Dollhouse (GameDev.TV  Jam). Seeking a role in game or interactive software development where I can apply my creativity, technical skills, and passion for immersive digital experiences.

WORK EXPERIENCES

Princess Nourah bint Abdulrahman University, Sep 2024 – Present
Teaching Assistant

- Led **laboratory sessions for Computer Organization**, teaching **assembly language programming** and low level system concepts.
- Conducted **practical sessions for Data Structures**, focusing on implementation, problem-solving, and algorithmic thinking.
- Taught **Professional Ethics**, addressing ethical responsibilities in computing, data privacy, AI ethics, and professional conduct.
- Prepared lab materials, exercises, and assessments.
- Assisted in evaluating student performance and providing academic and technical guidance.
- Coordinated with course instructors to ensure alignment between theoretical lectures and practical sessions.

Information Technology Deanship | Imam University, Jun 2024 – Aug 2024
Chatbot & AI Intern

- Developed and deployed a chatbot using Microsoft Copilot and Botpress, improving system performance and user interaction.
- Integrated external data sources to deliver accurate and dynamic real-time responses.
- Applied AI algorithms to enhance chatbot responses through user behavior analysis and feedback loops.

PROJECTS

Coffee Rush  , *Simulation game* Jun 2025 – Jul 2025
Coffee Rush Is A 3D Time-Management Simulation Game Developed In Unity, Designed Simulation Game Developed In Unity, Designed From A First-Person Barista Perspective.

Apex Formula  , *Racing Game* May 2025 – Jun 2025
Is A Fast-Paced, 3D Formula One-Inspired Arcade Racing Game Designed For Local Multiplayer With Up To 2 Players Or 4 Players On A Single Device. Players Compete Head-To-Head . Selectable Cars And Tracks, Using Chaotic Power-Ups Like Speed Boosts, Oil Slicks, And Control-Reversing Traps And Others. With A Focus On Local Fun, Fast Rounds, And Controller Accessibility, Apex Formula Delivers A Streamlined, Competitive Racing Experience.

Doll House  May 2025
Is A Dark, Story-Driven Puzzle-3D Game Where A Young Girl Is Cursed And Shrunk Into A Haunted Dollhouse After Mistreating Her Doll. To Break The Curse And Return To Normal, She Must Explore The Eerie House, Solve Puzzles, And Rebuild Her Lost Bond With The Toy Through Memories And Compassion.

Reset  May 2025
FBS Short Game

Ghost Village 
3D Horror Exploring Game

May 2025

GravityRunner 
2D Platform Game With 2 Levels

Jidad Time 
Pong Game With Saudi Arabia Style And Special Features "Local 2 Players "

Arshidni Chatbot  Jun 2024 – Aug 2024

- Developed a tourist guide chatbot for Saudi Arabia using Microsoft Copilot and Botpress.
- Integrated external data sources to provide personalized responses to users.

Graduation Project - BAASYIR Aug 2023 – Feb 2024

- Led the development of a real-time obstacle detection system for the visually impaired.
- Used YOLOv7 and YOLOv7-tiny models to improve detection accuracy.
- Integrated the system into smart glasses running on Raspberry Pi 3 Model B+.
- Collected data, trained models, and evaluated performance using the mAP standard.
- Integrated hardware and enhanced detection performance across various environments.

Emotion Classification System

- Developed an emotion classification system utilizing BERT along with feature extraction techniques.
- Enhanced the accuracy of emotion classification by training on diverse datasets.

COIN CUE\$T 

- Designed and developed a game using Unity Studio.
- Prepared comprehensive game documentation, including:
- High Concept.
- Game Design.

TECHNICAL SKILLS

Programming Languages — C#,C++ ,Python, java,Javascript, **Unity Engine, Artificial Intelligence, 2D and 3D Game Design, Gameplay Programming, Chatbot Development, Game Development, Botpress**

EDUCATION & COURSES

Tuwaiq Academy, Game Development Using Unity Engine Apr 2025 – Aug 2025
Hands-on training in Unity and C# for 2D/3D games. Created games like *Ghost Village*, *Reset*, and *Dollhouse*.

Udemy, RASA for Beginners 2024
developing ChatBot Using RASA NLU engine

Imam Muhammad ibn Saud Islamic University, 2024
Bachelor of Computer Science

Satr, Web Development Course 2023
Covered HTML, CSS, JavaScript, Node.js, and MongoDB.

COMPETITIONS

GameDev.TV Game Jam  Jun 02, 2025
Particpate in GameDev.TV  Game Jam with my team and Take Overall Rank 56 from 1030

PSU & ACM Programming Competition 2021
Participated in coding challenges

VOLUNTEER WORK

Advisor Provided consulting in planning and managing events	Aug 2024 – Present
Japanese Teacher Taught beginner-level Japanese	Dec 2024 – Jan 2025
Member Organized and participated in language-related events	Aug 2023 – Aug 2024

LANGUAGES

Arabic Excellent	English Excellent	Japanese Good
